

Mobile Crusher

Designed to meet today's recycling, quarrying & mining needs the HRI **Big Track** Mobile Crusher range is efficient, versatile and produces high production rates.

Available in either 1100 x 800mm and 900 x 600mm the **Big Track** comes with a K series single toggle jaw complete with automatic hydraulic jaw adjustment setting. An efficient crusher motion maximizes output and provides a reduced requirement for secondary crushing.

Features include:

- Maximum clearance between the crusher and the main product conveyor.
- Optional transport system fast set-up.
- Two hopper options.
- Optional fines conveyor.
- Optional magnetic separator.

Efficient · Versatile · Maximum Output
